

MedStar Family Choice (MSFC)

Quick Reference List

This **MedStar Family Choice Quick Reference List** is not inclusive, but represents a summary of prescription coverage. **Generics should be considered the first line of prescribing.** Unless specifically indicated, drug list products will include all dosage forms. Generics listed in therapeutic categories are for representational purposes only. This is not an all-inclusive list. Listed products may be available generically in certain strengths or dosage forms. Dosage forms on this list will be consistent with the category and use where listed.

If there is no generic available, there may be more than one brand-name medicine to treat a condition. These preferred brand-name medicines are listed to help identify products that are clinically appropriate and cost-effective. This list represents brand products in CAPS, branded generics in upper- and lowercase *Italics*, and generic products in lowercase *italics*.

Refer to the Formulary Booklet or the Formulary section on this website for a complete listing. You are welcome to call MSFC at 1-800-905-1722 to inquire about coverage for any medication, formulary or non-formulary.
